

Tabletopia (online) tips

- Tabletopia's limit is 8 players, but if more than one player in your group can share a screen, you can play 10. All the pieces and cards are there to do so
- Shift + (drag) select gets entire deck, or multiple pieces (like 2 zombie pieces moving same way)
- Lay your character card & collected items on the table so people can see what you have, like in the normal tabletop version.
 - Or you could try keeping things in your 'hand', but you'll have to be very attentive to minusing action points for resource items, as no one will be able to remind.
There will be more implications to this way of doing things as well, which some might think good.
- Turn order, you'll have to figure as a group.
- Couple rules updates (from 2015 edition). Main things are:
 - *Online rulebook is updated with all this.
 - Auto-zombie
 - New items: Grenade, Hockey gear, Emergency stim, Shopping cart
 - If Grimsby chooses to re-roll on defence, the second roll is the one that counts.

Let me know what else could be added here.

Thanks!

- Rob
