In Flourish, you will be creating a beautiful garden of vibrant flowers, majestic trees, alluring paths, and eye-catching features. You must carefully choose which cards to keep for yourself, and which to pass over the walls to your neighbors. Sit down with friends, sip a cup of tea, and enjoy an afternoon in the sparkling world of Flourish—a place you will want to return to time and time again.

Components: 98 Cards - 7 Scoreboards - 7 3D Walls
24 Ribbon tokens - 3 Medal victory tokens - 1 Victory card
3 Rulebooks (multiple languages)

Setup

1) Give each player a scoreboard set at 0.
2) Place a Wall piece between each player.
3) Shuffle the deck and deal 6 cards to each player as their starting hand. Players look at their hand of cards.
4) Place the deck in the middle of the table.
5) During the game each player will build a garden in the space in front of them.

4 Player Setup

[Diagram showing setup for 4 players]
Overview

*Flourish* may be played competitively or cooperatively, using the same rules. Decide which way you will play before beginning the game.

If playing cooperatively, players may talk about any cards that have already been played, but they may not share any information about cards in their hands.

The game is played over 4 rounds. During each round, you will play a total of 3 cards, then score any End of Round abilities played in the current round. At the end of the game, after the 4th round, you will score all cards in your garden with End of Game abilities.

Card Details

Each card in the deck has an End of Round scoring ability (shown at the top of card), and/or an End of Game scoring ability (shown at the bottom of the card). Most cards also have 1 or more colored plant symbols shown on the left side of the card.

Cards are worth points according to how many plant and stone symbols are in yours or your neighbor’s garden. **Your neighbors are only those 2 players directly to your right and left.**

Gameplay

Each turn of the game is played simultaneously by all players.

PLAY & PASS

Each turn you will begin with 6 cards in your hand. Choose 1 card to play and 2 cards to pass.

Place the card you are going to play facedown in front of you. Pass 1 card facedown over the Wall to each of your neighbors: the players directly on your right and left.

Pass a card facedown over the Wall to each neighbor

Once all players have played and passed, all players should reveal their played card. Then draw the 2 cards passed to you and 1 additional card from the top of the deck.

Continue to play and pass until you have played 3 cards. This is the end of the round. Note: For ease of scoring, arrange the cards for each round in their own row, creating a 3 x 3 grid over the course of the first three rounds.

SCORE THE ROUND

Check to see if any of the cards you played this round have an End of Round scoring ability. If so, score the cards played this round by counting the relevant symbols on all appropriate cards, even if those cards were played on a previous round. End of Round scoring abilities that were played in a previous round do not score again. Keep track of your score on your scoreboard.
THE FOURTH AND FINAL ROUND
After scoring the third round, draw the 2 cards passed to you, but do not draw an additional card from the deck.

Each player chooses 3 cards to play facedown and discards the remaining 2 cards facedown.

When all players have chosen their 3 cards to play, reveal the cards and then score any End of Round abilities on those played cards.

END OF GAME
Finally, all players score all cards in their garden that have an End of Game ability.

Competitive
The player with the highest score wins the game. If tied, the player with the most unique plant symbols wins. If still tied, the player with the most unique stone symbols wins. If still tied, the player with the most end of round abilities wins. If still tied, the players share the victory.

Cooperative
Add all player’s scores together, then see which medal you have won as a team! See page 6 for a list of medal requirements.

Two-Player Rules
Follow all rules as normal, except that you will pass 2 cards to your only neighbor.

Scoring of Path cards is altered to count symbols in both your neighbor’s garden and your own garden.

For other cards that normally compare to either or both neighbors, compare to your only neighbor.

Scoring Examples

In Round One, you play a Path, Tree, and a Feature.
The Path gives you 2 green symbols, and at the end of the game it will be worth 3 points for each tree in both of your neighbors’ gardens.
The Tree gives you 3 green symbols and will score at the end of this round for each green symbol you have (5). At the end of the game, it will be worth 4 points for each green Path you have (currently 1).
The Feature does not give you any symbols. It is worth 9 points at the end of the game if your Garden has at least 1 Tree in it (which it already does).

In Round Two, you play a Lawn, a Hive, and a Plant.
The Lawn does not give you any symbols. At the end of the round, it scores you 1 point for each green symbol you have (5). At the end of the game, it will score 1 point for each Stone symbol you have (currently 5).
The Hive gives you 1 red symbol and will score at the end of this round 2 points for each blue symbol in 1 of your neighbors’ gardens. So if a neighbor has 3 blue symbols, it will score you 6 points.
The Plant gives you 1 red symbol and will score at the end of this round 1 point for each green and red symbol you have (5 green, 2 red, for a total of 7 points).
Garden Show Variant

Compete in the Garden Show to win ribbons and be crowned the ultimate champion gardener after three games! This variant is designed for competitive play only.

SETUP
Shuffle the Ribbons and give each player three. If a player has a duplicate, deal again until all players have three unique Ribbons. Each player should place these Ribbons faceup beside their scoreboard for all players to see.

GAMEPLAY
You will play three consecutive games, maintaining your score for all games. At the end of each game, check to see if you have won any of your Ribbons. To do so, your garden must have the most symbols shown on the Ribbon compared to all other players in the game (you do not win the Ribbon if you are tied). If so, flip the Ribbon over and score the 7 points for it. Otherwise, leave it faceup; you will have a chance to earn it during the next game. You may win more than one Ribbon in a single game.

The player with the most total points at the end of the third game is the grand winner.

Solo Rules

In the solo game, you will be competing against an opponent named McGregor. Your final score will be your total score minus McGregor's total score.

SETUP
Place a scoreboard on the table for yourself, and one beside you for McGregor. Shuffle the deck and draw 6 cards for yourself. Then deal 12 cards in a facedown deck on the opposite side of McGregor’s scoreboard from where you are sitting (if his scoreboard is on your right, place his deck on the right of his scoreboard).

GAMEPLAY
On your turn, play 1 card to your garden, and then pass 2 cards to McGregor by placing them in a stack on the side of his scoreboard closest to you.

Then play the top card from McGregor’s deck into his garden and draw 2 cards from his deck into your hand, plus 1 more card from the main deck.

Finally, take the 2 cards you passed to McGregor and shuffle them into his deck and then place it back facedown. You are never allowed to look at the cards in McGregor’s deck.

SCORE
Every time you score at the end of the round, also score McGregor's garden; keep track of his score on his scoreboard. Also score his End of Game abilities at the end of the game.

Subtract McGregor’s total score from your total score to determine your overall score. Then see which medal you have won! See page 6 for a list of medal requirements. You may also find it enjoyable to keep a record of your highest score ever for all your solo games.

Compost Variant

This variant offers a way for players to cycle through more cards in the deck.

In addition to passing cards and playing a card, each turn you may choose to discard 1 card faceup from your hand, allowing you to draw 2 cards instead of 1 at the end of the turn. Place discarded cards in a messy pile beside the deck.

If you discard at the end of the third round, draw 1 card to bring your hand back up to 5 cards before choosing the 3 cards to play on the final round.

If the deck ever runs out, shuffle the discard pile to create a new deck.

Note: If using this variant in a cooperative or solo game, increase the required medal scores by 5 points per player.
