#  <br>  

## Rules

The year is 3042 , and humanity is ready to explore the stars. The most interesting clestial bodies nearby have been studied for centuries, and the best candidates for exploration and colonization have been identified. At long last, the liations of the tarth have the technoloqy to rearh them. A peaceful competition has bequn as they send their starships into the cosmos. In the end, all of humanity will win. But which hiation will be remembered as the greatest pioneers?
 Players must carefully manage their Resources as they colonize. exploit, and terroform the Planets of the Milky Way, developing rritical Technologies as they go. tath round, you must choose which artion to perform and which bonuses to activate to further your goals. The liation with the most Victory Points ot the end will be remembered by history as the greatest explorers in the galaxy!

36 masitilamisis

## 24 verad tokens

12 Colonial Medals
12 Technological Medals
1 Round Marker

1 First Player marker

Scoring notepad
Science Booklet

+ Solor rules in Italian
Science Booklet
+ Solo rules in English

## 4 sets

of Player Pieces
(1 per player) each including

Game board, showing:
The Niky Way galaxy, divided into three Zones: Short-Range stars [The stellar Local iroup) Mid-Range Stars

* long-Range Stais

Incluted in the Vilky Way are:
the Sol hex
the Sagittarius A* Black Hole hex 20Star hexes:
396 Spacẹ hexes (including 6 around Sol)

Below the Miky Way titiere are: Spacees for the cardidecks The Game found Trak

## SETTNNG UP THE GAME

1. Place the game board on the toble. Take all the Celestiol Body tiles $\langle\mathrm{t}\rangle$ and take a look at a Planetory Summary. The planets with the symbol $\equiv$ are used in $3+$ player games and the planets with En are used in $4+$ player games. Al the other planets are always used.

Add 1 Mine tile and 1 (olonial Target tile
 player to the planets used.
Shuffle all these tiles face doun and place them on the game board randomly. tach tile must be adjarent to a Stor hex (except Sol), but must not be adjacent to any other (elestial Bodies. In 3-player games, this kind of stars cannot have any adjarent tiles: *\%. In 2-player games, this kind of stars also cannot have any adjacent tiles:

Designer Niote: we tested this plocement a lot of times (really!) and we saw that it can be made completely randomly without affecting the game victory. However, if you want, you can distribute the tiles to the players and they can toke turns placing tiles one by one.

The (elestial Bodies are the gool of the explorers: Ponets to discover, colonize, and terraform, Mines to exploit for Resources, or colonial targets to be explored for their scientific relevance.

2

All the stars near the tarth have been examined carefully by telescope for centuries, and ore well known to the exploring Notions.

3Place 10 Medals on the marked spaces of the Technological - Leadership Track and the (olonial Leadership Track (5 Medals per track). Keep the other Medals near the boord in easy reach.

Mations advance on these tracks mainly by developing Technologies and Colonizing Plonets, earning rewards from the people of tarth as they do: Resources during the game and Victory Points at the end.

4.fach player chooses a color and takes the mathing set of Player Pieces:
o. Place five of your Ilation markers on the starting spaces (on the left) of each row of your Technology Board.

During the game, you will advance your Mation's Technologies by Spending the Resources shown to earn more efficient actions and advantages during the game.
b. Place your Action (ube on the Terroform Panets space of your Aation Doard (in the center).

tach turn, you must move your Action (ube to a different spare, which determines which artions you can toke that turn.
c. Place one of your Mation markers on the starting spaces of both the Technological Leadership Track and the colonial Leadership Track.

d. Keep your five remaining Hation markers close by: you will use them to show which Planets you have (olonized.
e. Set your tarth card in front of you. It refers to the Sol hex, where all players start.
This is a special Planet card that all players start the game with. It represents your Motion on tarth. Planet cards will be used during the game to produce Resources that can be spent to advance Technologies, build starships, or Terroform Planets.

f. Place 3 Matter Resources and 3 Energy Resources on your tarth (ard.
g. Place your remaining Resources (four Matter, four Energy, and three Antimatter) on the Resources Storage spare of your Action Board.
h. Keep your Panetory Summary, Round Summary card, and Scoring cord handy so you can reference them during the game.
5. Sort the Planet cards by number and place them on the Planet (ards space of the game board with the (olony side up. Number 1 should be on top, and liumber 28 on the bottom.

6Shuffle the Progress cards. Remove 2 at random and return them to the box without looking at them. Place the remaining If cards face down on the Progress (ards space of the game board.

Decide if you are playing with the Stondard Objectives or the Advanced Objectives. Shuffle the appropriate Objective cards and deal one card to each player. Keep your Objective secret from the other players! Return the other Objective cards to the box without looking at them.

8After considering your secret Objective card, advance two of - your liation markers on your Technology Board one space (to the right) for free (you must advance two different Technologies).

Example: John advances his Mation markers to the first step of I-Space Travels and III-Energy Development.

Place the Round Marker on the 0 space of the came Round track.

The last player to read an article about astronomy takes the first Player marker. Your exploration of the golaxy is ready to begin!

## GAME TERMS

As you read these rules and play the game, it will be helpful to know how certain game terms are used:
(elestial Objects: They can be Planets, Mines, or (olonial Targets. In ony case, it's useful to explore them!
Spare thexes: Most of the game board is made up of empty Space hexes. Your Starships can move through these areas of the game boord.
Panet: $\AA$ world that you can colonize, exploit, and improve by terraforming. Planets are represented by Panet cards. Your tarth (ard is treated as a Planet card in all ways. Of course, it's alreadu terraformed!
Mine: All that remains of an exploded star, supernova remnants are not suitable for human habitation, but they are rich in valuable elements that can be used to Regenerate Resources.
Resource:Thisis ageneri term that refers to the three kinds of Resource (ubes: Matter, Energy, and Antimatter. Resource management is the core of the gome and requires qreat attention. Resources can be

DRODII(ED), SEEIIT.
 location to another. You will need Resources to accomplish many tasks in the game, such as building Starships, terraforming Planets. advancing Technologies, or performing extra actions.
When a rule talks about PRODICCliic Resources, it means taking those cubes from the Resources Storage on your Action Board and placing them on one Planet card that you control.

SPEiliblía Resources means taking those cubes from only one of your own Planet cards and putting them bark in your Resources storage. Obviously, you cannot SPEiliD Resources until you have PRODI(Ct) them!

To Bixil Resources means taking those cubes from either your Resources Storage and/or from your Planet cards, and placing them in the (Iausius' Dit on your Action Board.
Be careful about BDRililic Resources! Resources in your (lausius' Dit will not be available for PRODDCTIDIi or SPEilD)IIG until you are able to RETAIIERRIE them.

When you R(Étilitel) IE Resources, you toke 1 of them from your own (lausius' Dit and return them to your Resources Storage.

Resources in this area cannot be PRDDU(Et)

Resources in this area (an be PRDDU(Et) (they go on a Planet (ard) or (they go to the (lausius' Dit). They cannot be Sptill.

## PLAYING THE GAME

Kepler-3042 is played over 15 game rounds. tach round is divided into three Phases, which must be completed in order:

1. Reveal Progress (ard
2. Individual Player Turns:

ว. Moin Action
b. Bonus Nations
c. Move Storships
d. Withdraw Starships
3. End Phase:
o. Resolve Progress (ard
b. Nward Medals
c. (hange first Player (or tnd of (ame)

## 1: REVEAL PROGRESS CARD

At the beginning of each game round, the first Player turns over the top Progress card from the deck and reads it out loud. This card will take effect during the 3.End Phase. so you will have the entire round to prepare for it! Move the Round marker one space to the right on the track.

Example: Paul is the first Player this round. He reveals the Extraterrestrial Knowledge Progress card, reads it, and places it face up in the Revealed Progress space. It doesn't do anything at this point, but at the end of the round all players will have an opportunity to purchase one Technology Level for free, possibly BURilling a Resource if they gain a 2

## 2: INDIVIIUUAL PLAYER TURNS

after the Progress card has been revealed, each player takes an Individual Turn. The first Player takes the first turn, with the other players following to the left.
Your Individual Turn is split into four steps, to be performed in order:

## 22. Main Action

first, you must move your action (ube to any different Main Nction Spare on your Action board (it does not have to be adjacent to the previous spare). Then, you may choose to take the action shown on that space. Main Actions are not mandatory, so you don't have to use the action if you don't want to, but you still have to move your action (ube. You can find descriptions of the Actions below (after "Leadership Awards").

## Leadership Awards

Some Actions will award you one or more or © . If so, advance your Mation marker on the corresponding Leadership Track. This may also grant you an extra benefit:

- If your marker reaches or passes a space with the icon, yOU may immediately RECtilitRATE one Resource of your choice.
- If your marker reaches or passes a space with the Resource icon, you may immediately PRODUCE one Resource of the indicated tupe on any one Planet card you control.
- If your marker reaches or passes a space with a Nedal, you must
immediately ploce that Medal on the Revealed Progress card. The Medal will be awarded during the next End Phase.. In addition, the position of your markers on the tracks at the end of the game may allow you to score Virtory Points.

Example 1: John earned ary , so he moves his Mation marker up 1 space on the Technological Leadership Track.

He lands on a Production Space that allows him to PRODUCE 1 Energy Resource on the Planet of his choice. He decides to PRODUCE the fnergy on his farth card.

Example 2: (eoorge earns a ${ }^{2}$. Moving his llation marker on the Track lands him on a Medal space. He takes the Medal token and places it on the fxtraterrestrial Knowledge Progress card revealed in Phase 1.

Example 3: John earns 2 2ty . In this way, his llation marker on the Technological Leadership Track reaches the space, so he REEEllifRXTES 1 Antimatter, placing it in his Resources area.

## ACTION DESCRIPTIONS

## Sph(e MUSSIOIS

You may build up to three Starships (if you have them availbole). To build a Starship. SFEill 1 Matter and 1 Energy from the same Planet and place the Starship in a space hex next to that Planet. Your new Starships can be used right away.
Ex(terilil: in the unlikely case that all the space hexes around the Planet are occupied by other Starships, the new one must be ploced in the nearest empty spare hex (if there are more than one, choose which one).

IMDDRTMiT: Starships built on the farth card must be placed around the sol hex.
fxample: George chooses the Spare Missions nction. He SPEliDS 1 Matter and 1 Energy from his farth card and 1 Matter and 1 Energy from the Planet 19 card. George puts two Starships on the Game Board, placing them on hexes adjacent to the Planets he took the Resources from (Earth and Planet 19).

## COLONIITE PLNitits

You may remove all or any of your Starships that are on Planet tiles and replace each with your liation markers. Take the Planet card that matches the Planet you just colonized and place it in front of you, with the (olony side up, immediately goining the © shown on the card.

IMDDRTMiT: To colonize a planet you don't need to Speili) anything, but you camnot colonize any Nien Planets O until lou have ceached the AlEili (ODOilite level of the V-Mntimotter Sience Technoloqy.

Playing tint: You can only colonize a maximum of five Planets. You mau move your Starships to other Planets beyond this limit, but you cannot colonize them. Most of the time, this will be a waste of resources.
fxample: John picks the Colonize Planets nction. His Starships are on the Planet 22 and 2 2 hexes and his Nlation marker in V -Antimatter Science is on Metamaterial Generator.

John withdraws his starship from Planet 22, replacing it with one of his llation markers, and puts the matching card in front of himself.

The Metamaterial Generator Technology allows him to create Alien Colonies, so John does the same on Planet 20. In this way, John earns 32.) (1 from Planet 22 and 2 from Planet 2б)

## It(HIIOLOGICAL DEVELOPMEHIT

You mau purchase any number of advancements on your Technoloqy, Chart by SPFilillific the Resources listed. You may purchase as many Technology Levels as you wish, as long as you can pay the costs. Some Technology Levels will aword you \& when you purchase them, which may award you Ressurres on the Technological Leadership Track (see "Leadership Awards", above). These Resources are availbble immediately, so they could be Sptiil to pay for additional Technoloqy Levels this turn. Abilities granted by your new Technology (such as from II-Quantum Physis) are also available immediately.

IMPDRTNiT: All of the Resources required for each Level must be SPEiil entirely from a single Planet.

An example of this 1ntion is on page 27, ofter the explanation of IIQuontum Physis.

## Stitlur PROPULIOII

You may immediately move all of your Starships, following the rules for Step 3: Move Storships. You will be able to move these Starships again during Step 3 as normal.
An example of this 1ution is on page 24, with the explanation of the movement rules.

## TERRAFORM PLAFitis

Modifying the environment of a planet will make it more suitzble for human use. SPtili) the Resources listed from a (olonu-side up Planet card you control to flip that card to the Terroformed side. All the Resources Sptiil must come from that Planet. Aso, you must have reached at least the minimum level of IN-Terroforming Technology, listed on that Planet cord in order to Terroform that Panet. 1 Terroformed Planet will be worth more Virtory Points, may allow you to gain © , and can PRODULE more Resources. You can terroform more than 1 Planet with a single artion, if you satisfy all the requirements.

Example: Ringo chooses the Terraform Planets Nction. His Mation marker in IV-Terraforming is on Planetary Engineering, so he can Terraform Level 1 and 2 Planets.

Planet 2 is Level 1 and requires 1 enerqy in order to be terraformed. Planet 5 is Level 2 and requires 1 Matter and 1 Enerqy. Planet 12 is Level 3 and requires 1 Matter and 1 Energy. The required Resources must be present on the Planets that Ringo wants to Terraform.

Ringo Sptilis 1 Energy from Planet 2 and 1 Matter and 1 Energy from Planet 5 , then he turns those Planets over to the Terraformed side. At the end of the fame, they will be worth 1 and 2 Victory Points, respectively. Although he ouns the required Resources, Ringo can't Terraform Planet 12 because he has not reached Alien Genetic Research yet, which would allow him to Terraform Level 3 Planets. Thanks to these terraformations, Ringo gains 3 C $(1$ from Planet 2 and 2 from Planet 5 ).

IMPDRTNiT: if there are any Resources remaining ofter the needed ones have been Spitiit to terroform, they remain on the Planet cord.

## GALKTIIC MAP

Using remote sensing tools and deep spare probes, scientists can learn a lot about a potential Planet. first, advance your Mation marker one space on either the Technological Leaderstip Track or the (olonial Leadership Trock (see "Leadership Awards", obove). Then, turn over four (elestial Body tiles of your choice, anguhere on the game board. Nll players now know the identity of those (elestial Bodies.

Example: Paul moves his Action (ube to the galactic Map spare. He chooses to earn a 2 ald then he reveals four celestial objects.

## EHilikiy sToRMg

This action allous you to PRODDCE the number of Energy Resources allowed by your III-Energy, Development Technology. You must plare all the fnerqy you PRODUE in this way on a single Planet you control of your choice.
Example: Ringo picks the fnergy Storage kction. His Nation marker in III-Energy Development is on Plasma Quantum (ollector, so he (an PRODUCE 4 Energy on a Planet of his choice. He chooses Planet 5 .

## PLAMITARY EXPLOTIATIOXI

When you toke this action. PRODLCE all of the Resources shown on a number of Planets you control. The number of Planets that can PRODVLCt is determined by your N--erereforming Technolooy. Plare the Resources on the Planets that Produced them. If you run out of Resources to PRODVICE, you only PRODDV(E what you have. Any excess Production is lost.

IMDDRTNiT: If your N-Teroforming Technoloqy is of level 0 . you (amnot PRODV(E on any Panet (but you an pick this action anyuay).

Example: Ringo has 3 Planet cards besides the farth when he chooses the Planetory Exploitation Nction. His llation marker in IV-Tercroforming is on Alien Genetii Research, so he can choose 2 of his Planets to PRODU(E Resources. He chooses 21 and 22 , where he PRODU(ES 1 fnergy + 2 Matter and 1 fnerqu + 3 Matter, respectively.

## GEIIIERIIE ATITIMSTITR

This artion allows you to PRODVCE the amount of Antimatter allowed by your V-Antimotter Sience Technology. All the natimotter produced must be ploced on a single Planet you control, of your choice.

Example: John's Mation marker in V-Intimatter Science is on the Metamaterial Generator Technology, so he chooses Generate Antimatter as his action and PRODUCES 2 Antimatter resources. He can choose to produce them on any of his planets, and chooses the farth.

## 2.b. Bonus Actions

If you wish. you may take up to two Bonus kations on your turn. The Bonus attions availbble to you are determined by the loction of your Action (ube: the Bonus action for the row and the column your Action (ube is in are the Bonus hations you may toke.

Bonus Kations can only be used ofter you have completed your Main action for the turn (or chosen not to). If you toke both Bonus N(tions, you may complete them in any order you choose. You are never required to toke any Bonus htions.
In order to use a Bonus stion, you must Dilkii one Resource of your choice. If you take two Bonus hctions, the Resources you 认UVixi can be the same or different, and they (an come from the same or different sources.

IMPDRTNiT: you can toke each Bonus Action only once per turn.
Example: George's Action (ube is on his Space Missions nction Space. He decides to BURHI I fnergy to use Space logistics first. Then he BURRIS 1 Matter to activate Cultural fvolution.

Playing tint: Remember that Resources in your (lausius' Dit cannot be used in any way as long os they remain there! There are a few ways to REfilitidite Resoures, but they are fairly rare. Numays think carefully before using Bonus attions!

## BONUS ACTION DESCRIPTIONS

SP)(E LOASSIICS: Place I Starship in a Space hex adjacent to any Planet you control without SpEillilis any Resources. You do not have to place your Starship next to the Panet where you zuviiii) the Ressurre to toke this bonus sation.

## TE(HIMOLOGICAL ADVAICEMEATIT:

PRODUCE 1 Antimatter Resource on any Planet you control.
S(IEIIIIFIC PROGRESS: Advance uour IIdtion marker
 one space on the Technoclogical Leadership Track.

(ULTURAL EVOLUTIOIV: Advance your Ilation marker one space on the Colonial Leadership Track.

EXPLORATORY PLAilillilis: You may immediately move each of your Starships up to 2 spaces, following the rules exploined in the 2.. Move ftarships section.

## wherimi

EXPLOITATIOII Of II.E.O.: PRODUCE one Matter and one tnergy on your tarth card.

## 2.d. Withoriaw Starships

after you have moved all of the Starships you want to move this turn, you may choose to withdraw ony or all of them, removing them from the game board ond returning them to your supply.
If you withdraw a Starship from a Mine, you may immediately REftiliteRTE one Resource from your (lausius' Dit.
If you withdraw a starship from a space hex or a Planet, nothing happens. If you withdrow a Starship from o Planet or o Mine, other Starships will be able to move onto that hex agoin.
You can withdraw your starship in any round, even if it reached its destination many rounds ago.

Playing tiint: llormally, you will never remove a Starship that is not on a Nine, but sometimes you may find that you reälly need a Starship somewhere else next round, but you don't have any left. li's not recommended to waste Resources like this, though, so try to avoid it!

after you have completed all four steps, your hodividual Turn is over. The player to your left now begins their turn. After all players have finished their individual turns, it's time for the 3 . tind Phase.

## 3. END PHASE

Once the Individual Turns are complete. follow these steps to end the round:

## 3.a. Resolve Progress Card

The Progreess ard reveaied during Phase I tokes effect nou. follow the instructions on the cord.

IMDDRTMIT: Al cards ore resalved in turn order, starting with the first Player and going to the left. Sometimes, the cards an have an effect on the other players!

Some cards have a requirement that rewards the player that meets it best, such as "The Players with the lowest level in Quantum Physis". If there is a tie, all the tied players receive the benefit.

## 3. A. Warad Merdals

Ilow, all the Medals on the Revealed Progress are awarded. The player with the most advanced llation marker on the Technological Leadership Trock takes all the Technological Medals (a) on the Revealed (ard, and the player with the most adronced Mation marker on the (olonial Leadership Track takes all the (olonial Medals

If there is a tie for the most advanced liation marker, all the tied players receive the foll number of Medals availbble-use the extro Medal tokens set aside at the beginning of the game. It the end of the game, eadh Medal is worth 1 Virtory Point.

## 3.c. New First Player

The player with the first Player marker gives it to the player on their right: That player begins the next round with Phose 1:Reveal Progreass (ard. If there are no more Progreess ards to reveal, the game is over (the Round Marker should be on space 15).

## TECHNOLOGIES

Technoloqy is the key to succesfful spare exploration. During the game, you will invest in five different Technologies. Your discoveries are recorded on your Technoloqy Doard.
tach level of advancement in a Technoloqy has a cost, in Resources, which you must SPEiliD in order to purchase that advanement. Ill of the costs of an advancement must be SPEilif from a single Planet you control.
Niew Technology Levels must be aquired in the order they are listed on your Technoloqy foard. for example. in I-ppace Travels you cannot learn spatial tending tngine unless you have already learned light Speed tinine.
Once you arquire a new Level of Technology, the benefits are immedibtely available to you, and can be used anyuhere-they are not limited to the Panet from which you SPtiliT the Resources.

See an example on page 27.

## ADVACCELENT AWARISS

Some Technological advancements will earn prestige for your liation when you acquire them, represented by the . Move your Mation marker up on the Technological Leadership Track each time you earn a . The effects of these awards are described in chapter 2.a. Main Kction.

## ONE GIANT LEAP FOR MANKND

Advances in Technology can improve life for all humanity. Whenever any player acquires a Technology with the ezl players con benefit: every player that has not reached the indicated Level for that type of Technology (1 or 2) immediately moves their Mation marker up to that space of their Technology (hart for free.
Example: Paul has just purchased Alien Genetic Research: a boon to humanity! Ringo has never acquired any IV-Terraforming Technology, so he gets to move his Mation marker up to the Biosphere level. John and (reorge already have Biosphere, so they receive no benefit from John's discovery.

## TECHNOLOACAL BENEFITS

I-SPA(E TRAVELS: This Technology determines how many hexes your Starships can move each turn during phase 2.c. Move Storships or through the Stellar Dropulsion Main Action.
$(\infty) \xrightarrow{\longrightarrow}$ If you reach the Wormhole Statilizer Technology, your Starships can travel much more efficiently. from now on, you (an build Starships by SPEililiicionly 1 Energy instead of 1 Enerquy and 1 Matter.
II-QUAIITUM PHIYSICS: This Technology offers two benefits:
Resource Transformation: tach turn, you can convert Energy to Matter and vice versa. The number indicates how many Resources you can convert each turn. When you use this ability, swap the Resource from any Planet you control for the other type of Resource from your Resources Storage.
Move Resources: fach turn, you can move a number of Resources among your Planets, taking them from any Planets you control and plaring them directly on other Planets. The number indicates how many Resources you can move each turn.

IMPDRTNiT: both of these abilities can be used in addition to any other actions you take during your turn. You can use them ot any point during your turn, before or after any other action. There is no cost for using these abilifies.

## An example of using this Technology is on page 27 .

III-EIIIERGY DEVELOPMEIIT: This Technology determines how many Energy Resources you con PRODU(E when you use the Energy Storage Main Action on your turn. Al the fnergy you PRODVI(t in this way must be placed on the same Planet.
Theory of tyerything: for the rest of the game you may choose to artivate both of the Bonus actions available to you on your turn by Builillic only one Resource (instead of two).
IV-TERRAFORMIIIG: This determines how many Planets you can choose to PRODICE Resources on when you use the Panetary txploitation Moin Action.
indizates the Terraforming Technology Level that you must have in order to Terraform that Planet. Every Planet has a minimum Level of Terraforming Technology that you must have in order to terraform that Planet.
V-AIIIIMATIER SCIEII(E: This Technology determines how many Antimatter Resources you can PRODU(E when you use the generate Antimatter Main Action on your turn.
Aien (olonies: If you reach the Metomaterial generator Technology, you will be able to colonize Alien Planets by sending a Starship there. Without this Technology, the (olonize Panets Main Mction has no effect on these Planets.

## THE END OF THE GAME

The game ends after the 16th Round-once the last Progress card has been resolved. How it's time to add up the score and see which lation has the greatest explorers!

## FINAL SCOBIIIG

At the end of the gome, you receive Victory Points for the following:

- 1 point for each Antimatter Resource on your Planet cards.
- 5 points if you have colonized one Planet of every Type (Rocky, Oceanic, fiant, Super-tarth, and Alien).
- 3 points if you have colonized at least three Planets of the same Type.
- 2 points for each of your Starships located on a Mine.
- 2 points for each Technology you have advanced to the maximum level.
- 1 point for each Leadership Medal you have collected.
- Points for the Planets you have colonized:

1 point for each Planet located in the Stellar Local (roup.
2 points for each Planet located by a Mid-Range Star.
3 points for each Planet located by a long-Range Star.

- Points for the location of your Nation marker on each of the leadership Tratks.
- Points for the Panets you have Tercroformed.
- Points for completing the mission on your secret Objective card.
The player with the highest Virtory Point totol wins the game! If there is a tie, the winner is the tied player who has terroformed the Planet with the highest number.

## Example of the Technological Development Main Action, with use of II-Quantum Physics

IMPORTNNT: everything in this example is the effect of a single Technological Development Main ^ction and happens entirely during in the 2.a-Main Action phase of the player's turn.

Ringo picks the Technological Development Action. His Mation marker in II-Quantum Physics is on Higgs field Management, so he (an move up to 3 Resources around on his Planets and convert 1 Matter into Energy or vice versa. He first moves 1 Matter from Planet 21 to Earth, then SDELiDS 1 Antimatter + 1 Matter from Earth to obtain Positronic Understanding.

Thanks to the on Positronic Understanding, all the players who don't already have it gain the Particle Accelerator Technology.

Developing Positronic Understanding awards Ringo 1 1th. Ringo's Mation marker reaches a space which allows him to PRODU(E I Energy on a Planet of his choice.

But Ringo doesn't have any Enerqy Resources in his Resources area, so he decides to use the Resource Transformation ability granted by tiligs field Management at this moment. Now he has Energy in his Resources area, so he can PRODU(E it.

Ringo has other Resources available, and can still move 2 of them among his Planets thanks to the Move Resources ability granted by tliggs field Management. So, he moves 1 Matter from Planet 21 and 1 Antimatter from the farth to Planet 22, then SPELlibs 1 Antimatter + 3 Matter + 1 Energy from Planet 22 to obtain Absolute Mastery of Genetics.

Thanks to the on Absolute Mastery of genetics, all players who don't already have it obtain Planetory Engineering.

Absolute Mastery of Genetics gives Ringo 3 2try. Ringo's Mation marker first reaches a space which activates a Medal, which is put on the Progress card, and then one that allows him to PRODUC 1 Enerqy on a Planet of his choice. Ringo decides to keep this Resource on farth for next round.
